THE YEAR IN REVIEW 2022

A photograph of a diverse group of people in a meeting or workshop. In the foreground, a woman with long brown hair, wearing a white sleeveless top, is looking thoughtfully to the right with her hand resting on her chin. Behind her, a man with a beard and dark hair is also looking in the same direction. To the left, another woman is visible, looking towards the camera with a neutral expression. On the right, the back of a woman's head and shoulder in a red top is visible. The background is a plain, light-colored wall. The overall atmosphere is one of focused collaboration.

Together with our members and partners, we strive for a more inclusive and sustainable economy, through knowledge-based activities, international cooperation and research

Key social and economic issues

- Lack of income is the main economic and social challenge for both IDPs and non-IDPs
- Increasing unemployment among IDPs and non-IDPs
- Decreasing family incomes
- Due to the increasing population in hosting communities, there is a need for more social services, especially for vulnerable groups among IDPs

**WHAT'S NEW IN THE
DIESIS NETWORK**

For our sector, the year 2022 will be remembered for having achieved greater recognition at the European scale with the Transition Pathway as well as at the global level with landmark policy initiatives such as the ILO resolution and the OECD recommendations.

In 2022 Diesis celebrated 25 years of international cooperation as a now global social economy network with a community event amazingly full of joy and participation whose energy still circulates and resonates here in Brussels and beyond.

As Diesis, we continued to grow and expand in both geographical coverage and production of knowledge. As you may discover going through the long and dense list of initiatives populating the activity report, it is a challenging task to choose only few to mention, though here are some:

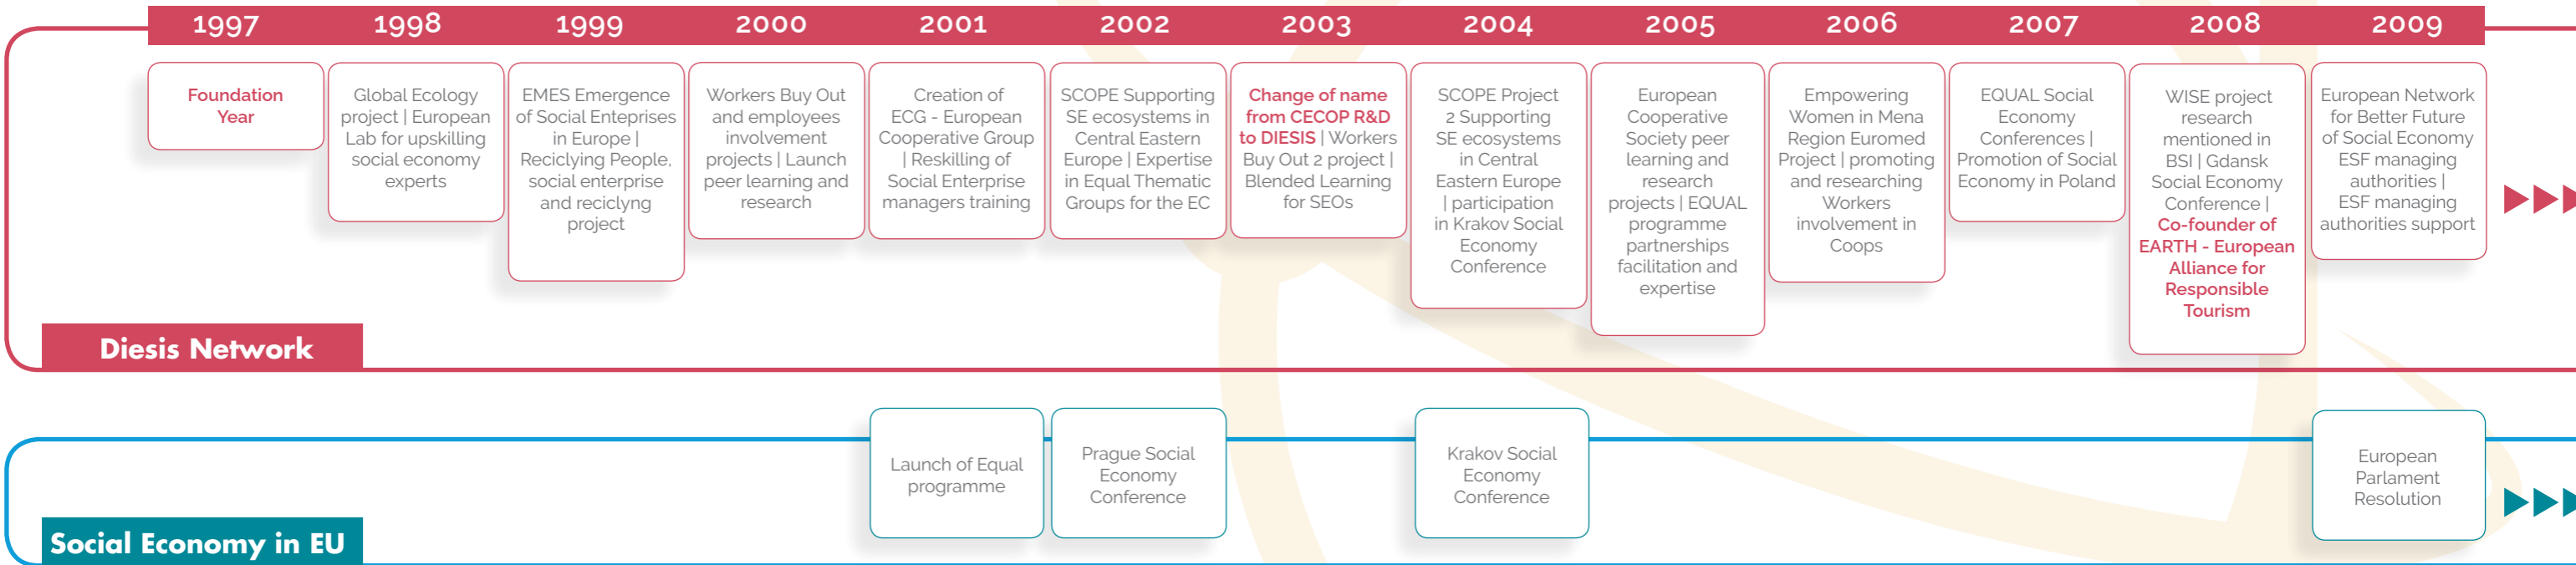

- We joined the Pact for Skills Alliance and Partnerships and co-coordinated the baSE project. This blueprint sectoral alliance cooperation will set the green and digital skills framework for the whole sector. A good start for 2023, the European Year of Skills!
- We led the consortium assisting the European Commission in drafting the Transition Pathway for the proximity and social economy ecosystem, the most important policy measure of 2022 at EU level.
- At the Policy event at the National Dialogue of Social Business Development in Lithuania we were able to persuade representatives of the European Commission, OECD and ILO to support the advocacy project of our member LISVA.
- The Western Balkans Alliance became a reality in December, and we look forward to continuing to support and facilitate the development of regional and cross-border developments of the ecosystems there.
- We entered the European Cluster Collaboration Platform (ECCP) as the first Social Economy meta cluster in order to connect our sector with SMEs innovation policies and funding support from the EC.
- We participated in significant events such as the *"Social Economy, the Future of Europe"* conference (in the framework of the French Presidency), the International Forum of SSE in Colombia, and the ISTO World Congress on sustainable tourism. In addition, we maintained our work within the United Nations Task Force on SSE and we had the pleasure to participate in the United Nations Event: *"How can the international recognition of #SocialAndSolidarityEconomy help achieve the #SDGs through social & inclusive innovation"*.

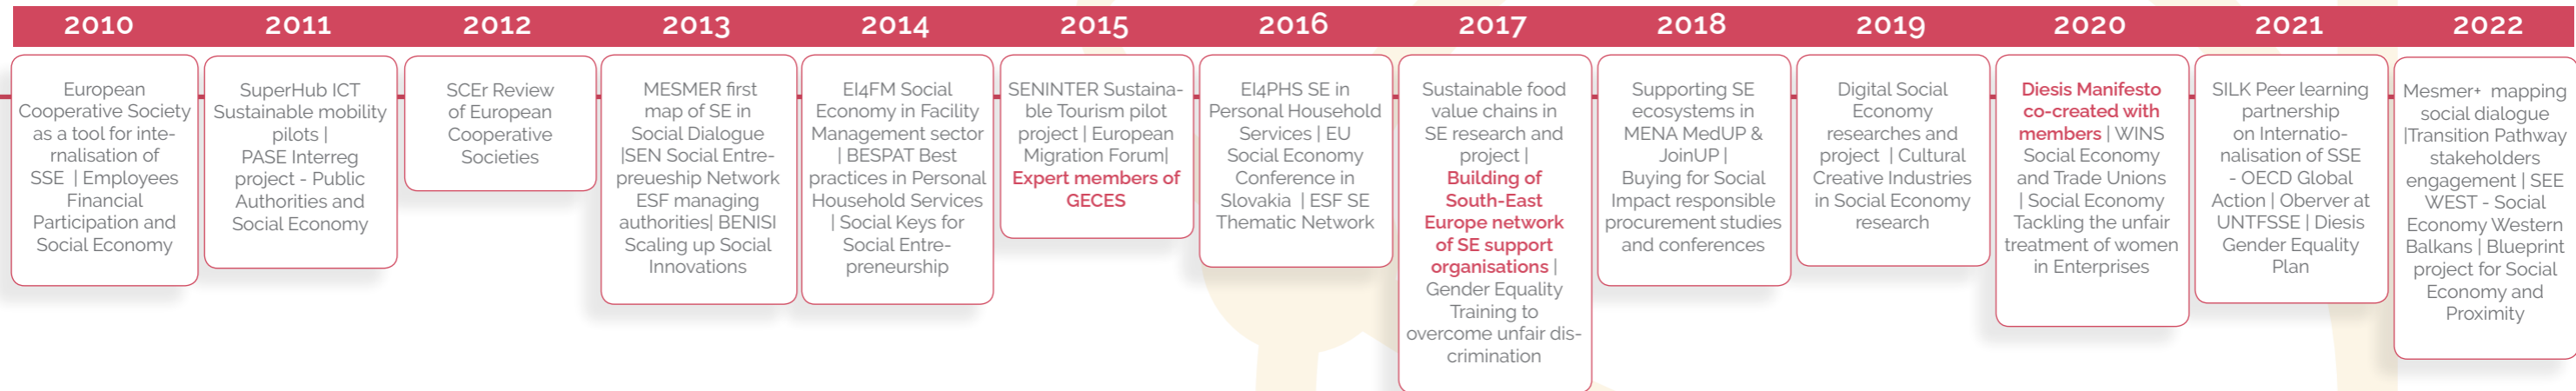

Dear Diesis community, let us celebrate our first quarter-century with a sense of satisfaction and look forward to what lies ahead. Our chosen motto for 2023 is EXPERIENCE. We strive to offer ever more EXPERIENCE in knowledge and support. We want you to EXPERIENCE more growth, collaboration and opportunities.

Gianluca Pastorelli,
Executive President

SOCIAL ECONOMY TOPIC
OF THE YEAR

THE TRANSITION PATHWAY

Together with the Social Economy Action Plan (SEAP), the European Commission has published an annex identifying “Scenarios towards co-creation of a transition pathway for a resilient, innovative, sustainable and digital proximity and social economy ecosystem”. Such a Transition Pathway process is currently under way for several of the 14 industrial ecosystems. Diesis was the consortium leader which supported the European Commission in carrying out several actions to develop the transition pathway of the proximity and social economy ecosystem. Namely:

- Analysis of the results of the online consultation organised by the EC;
- Organisation of a set of online workshops to collect the opinions and needs of the ecosystem stakeholders, and identify areas of joint action for the green and digital transition;
- Organisation of a workshop during the “Social Economy: The Future of Europe” conference in Strasbourg;
- Preparation of orientation and policy papers on the digital and green transition of the proximity and social economy and of the workshops report;
- Organisation of the final launch event held in Brussels and online on 14th November.

KNOWLEDGE

Knowledge building involves making a collective inquiry into a specific topic and reaching a deeper understanding through interactive questioning, dialogue, and continuous improvement of ideas. Sharing and exploiting knowledge is central to Diesis's ability to thrive and has significant relevance for developing the enterprises it represents.

To remain competitive and to address economic, environmental and societal challenges, the social economy ecosystem needs to invest significantly in the re- and upskilling of employees, entrepreneurs and volunteers, but we should also invest in acquiring, sharing and optimising our know-how. Meanwhile new generations of social entrepreneurs need to receive the right support for their growth.

Our members are essential players in building the knowledge of the Diesis Network, and together with them, we pursue various knowledge paths every year. Writing articles, conducting research, peer learning, masterclasses, capacity building activities, upskilling training and mentoring programmes and reskilling pathways for the inclusion of vulnerable groups are just some of the opportunities implemented by and with our members.

Diesis, with its long experience, covers various topics and every year aims to discover and understand the role of the social economy in new emerging trends. Our work can be summarised under 4 main areas of work:

WORKING CONDITIONS AND GOVERNANCE

Social economy enterprises with their focus on social “good” often do better than mainstream companies. Regarding governance, SEEs are by nature democratic organisations. To keep and promote best practices within and outside the SE sector, Diesis runs a number of projects and works with a wide network of partners including trade unions, research institutes, EU institutions and experts.

SKILLS FOR SOCIAL ECONOMY

Developing skills for social entrepreneurship through training and education is an important way to empower people and raise awareness of the benefits and added value of the social economy for the community. Diesis brings its expertise in social entrepreneurship to bear by promoting a modern, integrated and holistic methodology based on formal and non-formal education and e-learning activities.

TWIN TRANSITION

Accelerating the digital and green transition has become a priority for the EU to face challenges innovatively. The twin transition – green and digital – will be key to establishing lasting prosperity. This requires skills sets to adapt to both transitions. Jobs will be created differently, and social structures will shift. Diesis's mission is to help social economy stakeholders to embrace the twin transition, by supporting them in acquiring the right skills and competences to achieve it as soon as possible, in line with the EU strategy.

EQUALITY AND RIGHTS

Our commitment to equality, anti-discrimination and inclusion is embedded in the way we conduct our activities as an employer, network, and partner. We consider equality to be part of the day job and an essential part of building a fair and sustainable future for the social economy. Diesis regularly promotes project initiatives to promote and preserve the physical and emotional health, safety and well-being of women employees.

NETWORK

Networking and engagement are the foundation of the Diesis Network. It is a core approach to making a collective positive impact and implementing solutions that strengthen the social economy ecosystem. The main principle on which this community is built – today and in the future – is collaboration. We aim to create a sustainable network through connecting and supporting members and partners to create conditions and space for capacity building, leadership and mutual support. We encourage openness and flexibility, and value consistency in engagement.

In 2022 we continued to strengthen the collective as a whole through a continuous process (a learning cycle). We built a solid basis upon which a favourable learning environment exists: a place where our members participate in a continuous dialogue through well-established network activities:

▶ **NETWORK GENERAL MEETINGS**

Flagship network meetings held seasonally for all Diesis members.

▶ **DIESIS LUNCHEBREAK TALKS**

Short, semi-informal talks focusing on one member to get to know the organisation and its initiatives.

▶ **DIESIS MASTERCLASSES**

This intentional learning aims to deepen our members' knowledge of a specific topic and awaken their curiosity to study the subject further.

▶ **DIESIS FEST**

Sessions dedicated to European Commission programme funding, which aim to transfer knowledge about the nuances of specific funding streams. They usually comprise theoretical and practical information delivered in collaboration with an EC policy officer as a guest expert on the funding in question.

▶ **DIESIS POLICY LABS**

Virtual events focused on policies and their realisation in diverse European ecosystems.

▶ **INNOVATION WORKING GROUP (IWG)**

The goal is to create multi-stakeholder groups to enhance partnerships and collaborations across sectors (SDG 17). The IWG also aims to raise awareness of a given issue, by bringing internal and external organisations together to share best practice.

VISIBILITY

As underlined in the Social Economy Action Plan (SEAP), *“further awareness should be raised on the innovative economic models offered by social economy enterprises and organisations, as well as the positive contribution of the social economy to European economy and society”*. Diesis works in this sense, promoting best practices, models and activities from the social economy in Europe and in the world.

Within the visibility pillar, there are mainly four different areas of work. They are all interconnected, but each has different actions, objectives and tasks:

▶ INSTITUTIONAL COMMUNICATION AND EDITORIAL STYLE

Diesis visual identity, and the way of framing messages following the organisation's values.

▶ SHARING OF KNOWLEDGE AND PRACTICES

Dissemination of research produced internally, as well as by the various projects carried out to make them accessible to the general public. In addition, Diesis designs and implements comprehensive online campaigns to disseminate our main topics using the latest digital tools.

▶ PARTICIPATION IN KEY EVENTS AND THE CONTINUOUS MONITORING OF EU TRENDS

The Diesis team follows, leads and participates in key occasions that recognise social economy trends around the world. In 2022 we made sure to be visible at all major SE events, such as *Social Economy, the Future of Europe in May*, *the Mont Blanc Meetings America and the ISTO World Congress* in October.

▶ DISSEMINATION AND ENGAGEMENT WITH AND FOR THE NETWORK

Through our social media presence, we ensure the visibility of our members, expanding capacity and influence in other parts of the world. One of the key points of Diesis's communication is to involve the network through actions dedicated to enhancing their presence as much as possible, making their work known while establishing connections with peers.

GOING GLOBAL

2022 showed the need to make faster progress in finding solutions to the systemic crises at international level. It also witnessed a series of events that accelerated the already growing recognition of SSE at global level. They started at the end of 2021 with the approval of the Social Economy Action Plan (SEAP) and continued with the 110th International Labour Conference and its resolution, the recommendations of the OECD and the event held in New York at the UN headquarters.

In all these milestones Diesis has been present, providing its support. The UNTFSSSE (United Nations Task Force on SSE) has played a role in highlighting the role of SSE in the agenda of the leading international organisations. Our active participation in this key piece of the international ecosystem is the result of our commitment and enhanced involvement beyond the EU. In parallel we have continued our support to social economy ecosystems in the Southern Neighbourhood and the Western Balkans. We also welcomed new members from Canada and Jordan and received requests from others in Cameroun and India.

This 2022 we continued our work in the global dimension through initiatives – such as MEDTWIN and the presentation of the study on the opportunities for impact investing to promote the social and green economy in the southern neighbourhood – and strengthened our partnerships at the United Nations Task Force on Social and Solidarity Economy (UNTFSSSE) and the ESS International Forum. We had the pleasure to be invited to participate in the United Nations event: *How can the international recognition of #SocialAndSolidarityEconomy help achieve the #SDGs through social & inclusive innovation.*

Diesis has intensified its commitment to be a relevant global actor and the above-mentioned events confirmed that our vision and strategic goals at global level are right. By increasing our effort, we have made our contribution to key milestones at international level that will equip social economy actors to address the various systemic crises. We have continued connecting with like-minded organisations and diverse stakeholders globally, so that we have the opportunity to find and further solve the sectorial challenges not only much faster but also in the most innovative way. Cross-border collaboration lies at heart of our values, and, as a social economy organisation ourselves, our existence is based on cooperating to transform our communities in Europe and in other parts of the world.

▶ THE MEDITERRANEAN (SOUTHERN NEIGHBOURHOOD)

Our engagement in Mediterranean neighbours has grown exponentially in the last three years with our participation as a key partner in several EU initiatives and projects such as MedUP, and JOINUP.

▶ SOUTH AMERICA

We started a cooperation with Latin America through what is only the first step in our minds: a joint project connecting enterprises from those countries to Europe. Colombia also hosted the Mont Blanc Meetings America 10th edition – ESS International Forum. We had the pleasure to be present as speakers and connect with many stakeholders.

▶ WORLDWIDE

Diesis had the opportunity to participate in the OECD Global Action on Promoting Social and Solidarity Economy Ecosystems, by leading one project (SILK) and being partner in another one (PL4SE). In both cases, it collaborated with organisations, institutions and governments from Mexico, USA, Brazil, India, Canada and Korea, as well as EU member countries. In 2022, Diesis continued to be a partner of the PCC Circle of Cooperators, a hub for research, community building and advocacy for co-ops that are making the digital transition.

MANIFESTO AND GENDER EQUALITY PLAN

MANIFESTO

Diesis's Manifesto was created collectively with our members in 2020. This bottom-up approach ensured that the network's future direction is determined by its community and that it delivers support that is specifically tailored to the community's needs. It resulted in setting strategic goals for our network. The Diesis Manifesto serves as "white paper" for Diesis's future activities and strategic direction.

► Download Manifesto [HERE](#)

GENDER EQUALITY PLAN

Diesis's Gender Equality Plan was designed and adopted in February 2022. The plan reflects the diversity within our organisation and the communities we serve, in line with the requirements set out by the European Commission. The primary objective of the GEP is to serve as a tool and framework for enhancing gender equality in the workplace and to enable the integration of gender into organisational practices.

7 WE ARE DIESIS

WE ARE DIESIS

Founded in 1997, the Diesis Network is now one of the largest networks specialised in supporting the development of the social economy, social entrepreneurship and social innovation.

In view of the high social, economic and ecological stakes, we are deeply convinced that a global commitment from all stakeholders and a collaborative approach is the only response to a global crisis. Diesis aims to contribute to the growth of social economy in Europe and worldwide.

Functioning as a unique ecosystem, we create and multiply our impact through close collaboration with our members, who represent over 90,000 organisations and 1.2 million workers through major national federations and support networks.

Together with our members, we support the development of social economy by sharing knowledge through peer learning, capacity building, cross-sectorial and cross-country exchanges of good practices and research. Through our initiatives we influence national, European and International policies.

Sustainability and innovation are at the core of Diesis's human-centred approach. We believe in an inclusive economy based on social and economic impact, in the primacy of the individual and the social objective over capital, and in democratic governance.

With a variety of profiles, backgrounds and origins, our team is actively engaged in implementing knowledge-based activities and continuously improving to serve our network efficiently and effectively.

The Diesis Network proudly operates as a member of Social Economy Europe, CE-COP-CICOPA, ESS Forum International, PCC Platform Cooperative Consortium, Lifelong Learning Platform, All Digital, the UnionMigrantNet network, the European Alliance for Responsible Tourism Hosting (EARTH), and the International Social Tourism Organisation (ISTO-OITS).
